Your Ballooning Itinerary:

After meeting, we will proceed to a nearby launch site. You are as much welcome to watch setting the balloon up as you are giving us a hand. After a short briefing the pilot will ask you to get into the basket and a couple of burns later, you will experience the over 250 years old form of aviation.

Towards the end of the flight, usually after about an hour, the pilot will navigate to a safe and accessible landing site.

Again you are welcome to help us packing the balloon or enjoy the impressions of the flight. A typical European balloon celebration with champagne or cider follows the packing.

From the landing site we will shuttle you back to the meeting point.
